(a) On or before July 1, 1982, the Board of Certification, with the advice and assistance of the Secretary of Environmental Quality, shall classify all surface water treatment facilities and all facilities for treating groundwater supplies that are used, or intended for use, as part of a public water supply system with due regard for the size of the facility, its type, character of water to be treated, other physical conditions affecting the treatment of the water, and with respect to the degree of skill, knowledge, and experience that the operator responsible for the water treatment facility must have to supervise successfully the operation of the facilities so as to adequately protect the public health.

(b) The Board shall notify users of such facilities when any classification of a facility by the Board would result in a certified operator's not being required to supervise the operation of that facility. Any user so notified may demand a hearing on the Board's decision, and that hearing and any appeal therefrom shall be conducted in accordance with Articles 3 and 4 of Chapter 150B of the General Statutes.
